**Subject: Pharmaceutical Factory Project in Ethiopia**

Dear His Excellency,

May Peace and Mercy of Allah be Upon You

I am pleased to inform you that we have prepared a technical and economic feasibility study for the establishment of a factory for manufacturing high-quality medicines. As the Qatar Government relies at present on the importation of such drugs from various sources around the world, it encourages and supports the establishment of such projects. Likewise because of my good relationship with the Ethiopian officials we have resolved with the help of God to put this project to the Ethiopian government. Due to our interest in having cooperation on this project with reputable companies that have made great strides in the production of different drugs, and the fact that Turkey is among those countries where this type of companies are available, we seek your help in introducing to us top three companies in this area so that we can communicate with them to see the extent of their interest in engaging such projects as partners. Please note that there is communication between us and some European companies and others on the subject, but because of the good relationship between our two countries, I am fully prepared to give Turkish companies more information on this project, and make a presentation to them

I look forward to receiving your kind reply at the earliest opportunity.

Wishing you and your staff every success and your brotherly country all progress and prosperity,

Please accept assurances of our highest regards.

**Your brother**

**Abdullah Salem Al Sulaiteen**
Chairman
